

Opinions about space and space exploration

I think space travel is exciting.
It helps us learn new things about the universe.

Going to space is bad for the environment.
Rockets make a lot of pollution.

We should fix problems on Earth first. Many people here need help.

Space is full of rubbish. We should clean it before going more.

We spend too much money on space. That money could help poor people.

help us protect
Earth. We learn
about the weather
and climate.

Space jobs are good. They give people work and new ideas.

We should use clean energy for rockets.
Then space travel won't hurt Earth so much.

We might find life on other planets.

That would be amazing!

The ocean is like another world. We should explore it more.

I don't care
about space. I
think oceans and
forests are more
interesting.

Some countries go to space just to show power. I don't like that.

I want to go to space one day. It's my big dream!

Space can help science. But we must be careful with money and nature.

Robots are better than people in space.
They don't need food or air.
